EDUCATION

University of Virginia | Charlottesville, VA

May 2027

B.A. in Computer Science

Courses:

- Data Structures & Algorithms I/II, Computer Systems & Organization I/II, Software Development Essentials, Software Engineering, Discrete Mathematics I/II

Extracurriculars:

- Association of Computing Machinery (ACM), Student Game Developers (SGD), the__incident Sketch and Video Comedy

TECHNICAL SKILLS

Languages:

- Python (PySpark, pandas, numpy, Selenium), C#, Java, HTML/CSS, SQL, C

Tools and Frameworks:

- Azure (Synapse, web services, AWS, Databricks, Django, Git/Github, Jira, Unity, Blender, Adobe Creative Suite)

RELEVANT EXPERIENCE

Research Data Lab, UVA Darden School of Business | Charlottesville, VA

May 2024 - Present

Technical Research Aid

- Built a full stack web app with **Django and Python** with guides for UVA researchers on using Darden's research development tools. Implemented a **content-management** system in the backend.
- Wrote **python scripts** to onboard new researchers that automatically deploy and assign **Azure** and **Databricks** resources.
- Built dozens of **SQL tables** in both Azure Synapse and Databricks from professional and enterprise business sources.
- Wrote a **python web scraper** using **Selenium** that utilizes **LLMs** to gather semantic data from the web for a Darden faculty research project

PROJECTS

Research Data Lab website | *Darden*

Ongoing

- Lead development for a Django web app hosted via **Azure App Services**.
- Designed tech stack based on requirements from Darden faculty and researchers
- Worked with UX/UI designers to plan and prototype the layout and design of the website
- Implemented **Contentful content management** to allow non-developers to remotely contribute articles

UVA Thrift | *Personal Project*

.Fall 2025

- Was the DevOps lead for a marketplace app built in **Django**.
- Implemented **AWS S3 storage** to handle user-uploaded content and other static files.
- Implemented **Google OAuth** to persist users across sessions
- Built the user profile page, allowing users to upload profile photos and change their names and biographies.
